EVIDENCE 05: TRAFFIC-CAMERA NOTE

Lead assessment and limitations

Case reference: FIC-MC-017/2026 | Fictional training scenario | Not real evidence

Observation

A fictional traffic-camera review is included to explore whether the service road offers a possible route away from the park. The scenario does not establish that Meera or any suspect appears in the footage.

What it may help establish

If authentic footage existed, it might help reconstruct vehicle movements, route timing, and direction of travel, subject to image quality and clock accuracy.

What it cannot establish alone

It cannot prove that a particular person took Meera, identify a person from an unclear image, or establish guilt from proximity alone.

Next steps in a real investigation

- Preserve the original recording and document the camera operator and export chain.
- Check camera time against a reliable reference and note drift.
- Compare routes and timestamps with independently verified information.
- Keep alternative explanations open and document both supporting and contradictory observations.

Integrity notice: This document is a fictional prop for a classroom skit. It is not an actual police record, forensic report, CCTV export, audio recording, or witness statement. Descriptions and transcripts below are simulated.
