EVIDENCE 02: CCTV REVIEW LOG

Simulated camera observations, not actual video frames

Case reference: FIC-MC-017/2026 | Fictional training scenario | Not real evidence

Camera inventory

• Park CCTV: general view of the play area and a portion of the main path.

• Camera 07: fictional view near the service-road approach. A newly indexed frame is described as showing a person in a yellow shirt in the distance.

• Traffic camera: fictional coverage of a nearby road. No vehicle or individual is conclusively identified in this prop.

Review note

The Camera 07 description is an investigative lead only. Clothing colour, distance, angle, resolution, and occlusion can cause misidentification. The person’s identity, intent, and connection to Meera are unknown.

Preservation checklist

• Keep the original native-format export and a verified working copy.

• Record camera ID, operator, export date/time, time-zone setting, and any clock drift.

• Calculate and record a cryptographic hash for each original export.

• Keep an access log and never overwrite the source file.

• Have a second reviewer independently verify any important timestamp or visual observation.

Suggested courtroom wording

“The clip may help establish a direction of movement, but it does not by itself establish who the person is or what happened.”

Integrity notice: This document is a fictional prop for a classroom skit. It is not an actual police record, forensic report, CCTV export, audio recording, or witness statement. Descriptions and transcripts below are simulated.
